

Public Lecture Series

The 2011 Japan Earthquake and Tsunami: Fukushima Nuclear Disaster

Speaker: **Motoyoshi Ikeda**
Professor Emeritus, Hokkaido University
Adjunct Research Scientist, Japan Marine Science and Technology Center

On: Monday, 12 October 2015

At: 17h30 (to 18h30)

Venue: Sci-Enza, Main Campus, University of Pretoria
(Note: The Prospect Street entrance is open until 18:00, however the Lynnwood Road or Lunnon Road entrances will still be open. See <http://s2a3.up.ac.za/directions.php> for directions and a map.)

It is four years since the March 2011 Japan earthquake that devastated great parts of Japan and set off the Fukushima Daiichi Nuclear disaster. Some of the effects still linger; of which the main concern is the radio-active material that spread into the Pacific Ocean and other areas.

International Symposium on
Nature and Land Management of Tropical Peat Land in South East Asia
Bogor, Indonesia, 20 – 21 September 2006

Prof Motoyoshi Ikeda will speak about the disaster, the after effects and also the most recent findings and models generated; including a brief on the role of the Oceanographic Society of Japan's Working Group in terms of notifying affected countries and how to contain and manage the radio-active threat.
